Mohammadia school of engineers

Sofrenor, Dpt RH

MOROCCO,

Object : Candidature for “Maintenance/production engineer”

Dear Mr/Ms

I am currently a freshly graduated engineer from the Mohammadia School of Engineers, Integrated Design and Production stream. Being interested in your company, I would like to send you my spontaneous application for an engineer position.

Indeed, I have been oriented towards the world of engineering since high school, and I intend to continue in this field, which continues to fascinate me with its noble sciences and its refined technologies. To do this, I have developed during my past academic years, in high school and also in preparatory classes, a solid knowledge and a strong Personality. Adding to this, the various assets, first on a professional level, that I was able to acquire at the EMI by working on projects that are free or supervised, and on a personal level that I developed within of the personal development club (LEAD) in a very short period. In addition, my internship at the Office Chérifien des Phosphates allowed me to gain a close understanding of the concepts seen in the academic context and the issues that an engineer faces in an industrial company. After which, I decided to discover the automotive field in an engineering internship at Renault-Nissan Tangier.

I have been drawn to the industrial world from a very young age and have always been curious and self-taught. I now want to orient myself in the field of maintenance and production, which is very rewarding in terms of technical expertise as well as educational.

I am at your entire disposal for any further information.

Looking forward to meeting you, please accept the expression of my respectful greetings.

Salaheddine SGHIR
